DETAILED ACTION

*** This office action is in response to Applicant's Amendment filed October 02, 2006.

Claims 1,2,5-6,9-10,13-14,17-18 are currently pending.

Allowable Subject Matter

1. Claims 1,2,5-6,9-10,13-14,17-18 are allowed.
2. The following is a statement of reasons for the indication of allowable subject matter:

Applicant's amendment filed October 02, 2006 and convincing remarks of record have overcome the rejections in the last office action. The references of record including Agarwal (6,596,583), Iizuka (2002/0190294), Otsuki (6,919,273), Olewine (2003/0067023), etc., alone or in combination, do not anticipatively disclose each and every aspect of the claimed method for forming a MIM capacitor to reduce interaction of high-K deposition with bottom a electrode, or fairly make a prima facie obvious case of the claimed method, in combination with other processing claimed limitations as recited in base claim 1, the inclusion of providing a capacitor opening in the substrate; providing the bottom electrode comprising TiN in the capacitor opening; thermally annealing said bottom electrode comprising exposing the bottom electrode to nitrogen gas while subjecting the bottom electrode to thermal processing; providing a capacitor dielectric layer in the capacitor opening on the bottom electrode; and depositing a top electrode on the capacitor dielectric layer using a plasma-free deposition process.
